

DATA SHEET

Remote WorkForce Enhanced VPN

Cloud-Based Multi-Network VPN Solution

Experience VPN the Way It Should Be

Remote WorkForce Enhanced VPN delivers next-generation VPN technology designed specifically for small and medium businesses with simple to complex network environments. Get intelligent multi-network routing, comprehensive security, and detailed monitoring without the complexity and costs of traditional enterprise solutions.

Core Value Proposition

Encrypted
communications for
remote workers

Zero Trust Security
for all applications

Built for distributed
network environments

Quick and frictionless
startup

Intelligent Multi-Network Access for Modern SMEs

- End-to-end encryption for all Internet communications
- Intelligent routing to multiple corporate networks (LANs, AWS, Azure, GCP)
- Enhanced online protection with malware protection and custom domain blocking
- Comprehensive activity monitoring and management time reporting

Core Features

Intelligent Multi-Network Support - Direct access to all corporate networks with automatic routing optimization.

Smart Resource Routing - Advanced routing engine automatically directs resource requests to the appropriate network. With Discovery Mode, the system learns and adapts automatically.

Complete Encryption - End-to-end encryption for all Internet communications using industry-standard protocols.

Malware Protection - Real-time malware filtering blocks access to known malicious sources, preventing viruses and phishing attacks.

Custom Domain Blocking - Flexible domain filtering allows administrators to block access to specific websites or categories for policy compliance.

Comprehensive Reporting - Detailed monitoring of time on/off the network, which can be a proxy for work hours.

Centralized Management - Cloud-based management console provides complete visibility and control from a single, intuitive interface. No specialized IT training required.

Tailored Options for Different Business Needs - Remote WorkForce is available in three levels of service: Basic VPN, Enhanced VPN, ZTNA.

1-1 Replacement for Enterprise VPNs - Drop-in replacement for traditional VPN infrastructure with seamless migration, while delivering superior performance and user experience.

Easy Upgrade Path - Built to enable easy upgrade from one level of service to another.

Enterprise VPN vs Remote WorkForce Enhanced VPN

Feature	Traditional Enterprise VPN	Remote WorkForce Enhanced VPN
Network Support	Single Network Access	Multiple Networks (LAN + Cloud)
Cloud Integration	Limited	Native AWS/Azure/GCP Support
Malware Protection	Not Included	Built-in-real-time Filtering
Activity Monitoring	Complex Logs	Comprehensive User Activity Reports
Management	Complex, On-premises	Simple, Cloud-based Console
Deployment Time	Weeks to Months	Hours to Days
Cost	High (Hardware + Licensing + Maintenance)	SME-friendly Subscription Pricing
Ease of Use	Complex Configuration Required	Intuitive Setup and Management

Flexible Offerings

Tailored Solutions for Different Business Requirements

Remote WorkForce is available at 3 levels of service, depending on company requirements:

Remote WorkForce Basic VPN

Encrypts all internet communications.

Remote WorkForce Enhanced VPN

Supports multiple corporate networks, LANs or cloud-based (AWS/Azure/GCP), with intelligent routing of resource requests directly to the appropriate network.

Remote WorkForce ZTNA

A true implementation of Zero Trust Network Access functionality. Users are granted access only to resources they are specifically authorized to use, and cannot even see any prohibited resources.

- Implementation in hours, not weeks.
- Simple to upgrade to next level.
- Each user can connect up to 5 devices with unlimited usage. Organizations can have a 30-day trial period at no charge.

	BASIC VPN	ENHANCED VPN	ZTNA
SECURITY			
Encrypt all Internet communications	✓	✓	✓
Direct access to corporate networks		✓	✓
Zero Trust security for corporate IT resources			✓
FILTERING			
Malware Filtering	✓	✓	✓
Customized block domains	✓	✓	✓
REPORTING			
Report time on/off network	✓	✓	✓
Detailed reports of user on-line activities		✓	✓
Specific IT resources accessed			✓

Summary

Remote WorkForce Enhanced VPN transforms how small and medium businesses approach multi-network connectivity. With intelligent routing, enterprise-grade security, and SME-friendly pricing, businesses get:

- Enterprise-Grade Security at SME prices with built-in malware protection
- Seamless Connectivity across LANs and cloud environments
- Simple Management with intuitive tools anyone can use
- Complete Visibility through detailed monitoring and reporting
- Predictable Costs with no contracts, no minimums, no fixed costs.

Replace your insecure SSL VPN with Enhanced VPN now to close SSL vulnerabilities and protect your company assets.
